

PRESS RELEASE: Pattison Agriculture Announces New Build in Humboldt, SK

September 28th, 2021

Pattison Agriculture is excited to announce the latest expansion of a New Facility East of Humboldt, SK, on Highway #5. The project will span over 30 acres, with over 51,000 square feet in the main building plus an additional 16,000 square feet of storage.

The new facility will be equipped with an 18-bay shop and 3 overhead cranes. Priding ourselves on high-quality service technicians, these enhancements will increase efficiency and allow for larger equipment to be serviced. In addition, an inside wash bay will allow for a dedicated area to wash equipment all year round.

Customers will enjoy a parts department that expands over 9,000 square feet to allow increased parts inventory and greater efficiency. The showroom will cover over 7,000 square feet to display new equipment, technology, parts, merchandise and more.

Pattison Ag prioritizes training and education for employees and will continue to do so with the addition of a training theatre with capacity to host over 50 people.

The new location was chosen with our customers and visitors in mind to access the facility easily and more safely, allowing for large equipment to be transported in and out. All these planned upgrades were made with customers and employees taken into consideration.

The Pattison Ag Team is thrilled for this expansion and investment in the community. The Humboldt location will begin its transition to the new building as early as December 2022.

“We’re pleased to be expanding and investing in the Humboldt community. This growth will bring in additional jobs, increasing our parts and service technician teams. Humboldt is a very strategic and important location for Pattison Ag and the Agriculture Industry. We look forward to serving the customers in the Humboldt area for years to come.” – Doug Tibben, President, Pattison Agriculture.
